Stamp Rally Event Recommended for International Visitors to Japan!

With the increasing focus on inbound travel, East Japan Railway Company Tokyo Metropolitan Area Headquarters has planned this stamp rally to promote distinctive Japanese culture and to help customers visiting Japan enjoy railroad travel as much as possible.

By stamping the designated "station stamps" on the special stamp book and answering a questionnaire, our overseas guests will receive a present.

The stamp rally is designed to be a memorable experience for customers, and we have carefully selected the design, paper quality, and stamp design of the stamp book so that customers can gain a true sense of Japan. The small gift is a bath salt inspired by Japanese hot springs; a nice memory of Japan to take home.
