I . Sacred Snowy Landscape

When snow falls, the historic shrines and temples are wrapped in silver, and the contrast of white with gold and black becomes even more breathtaking. Those fortunate enough to encounter the gently falling snow are truly lucky. As if covered by a soft fabric, sounds are absorbed, highlighting the profound silence—wander through this "Silent Sanctuary" with an open heart.

II. Discover the Winter Wonders of Nikko National Park

With the arrival of winter, Nikko National Park is transformed into a world of profound silence and ethereal beauty. Discover a landscape of snow-dusted forests, frozen waterfalls, and an overwhelming sense of clarity in the crisp air. Amidst the serene atmosphere where nature and culture breathe as one, come and find your own miraculous moments that only winter can offer.

Experience the Magic of "Diamond Dust" Powder Snow

Located within easy reach of Tokyo, Okunikko is a hidden sanctuary for premium powder snow. The snow here is so dry and light that it squeaks underfoot and slips through your fingers, making it impossible to form a snowball. This "miracle snow" is a gift from the unique local climate. As moist air from the Sea of Japan crosses the mountain ranges, it sheds its moisture, arriving in Okunikko as intensely dry, frigid air. When this dry chill meets the sub-zero temperatures of Okunikko Yumoto Onsen, it creates ultra-light, crystalline flakes that dance in the wind. On the snowshoeing trails of Okunikko Yumoto Onsen, you can immerse yourself in this fluffy, weightless wonderland—a true paradise for winter explorers.

III. Effortless Winter Wonders

Discover stunning winter landscapes accessible by public transport, allowing you to enjoy the snow without the need for mountain trekking.

Just two hours from Tokyo, Nikko is a place where UNESCO World Heritage sites, untouched nature, and a breathtaking night sky quietly come together.

Beyond its famous shrines and temples, Nikko holds a lesser-known story deeply connected to the stars. From the legend of Shodo Shonin, guided by a deity associated with Venus, to Tokugawa Ieyasu, who chose Nikko to be enshrined beneath the North Star, this sacred land has long been shaped by a hidden connection with the stars.

This special stargazing event invites you to experience Nikko as a place where history and the night sky gently overlap. Collect beautifully designed Star Cards around the city, listen to stories curated from ancient beliefs, and look up at the same sky once gazed upon by those who shaped Nikko's history. As day turns into night, let the stars guide you to pause, listen, and make a quiet wish beneath the sky.

VI. Taste of Tradition: Winter Specialties Loved in Nikko

Savor the Winter Flavors of Nikko: Yuba, Yokan, and Strawberries

In Japan, the New Year is celebrated with *Osechi-ryori*—an assortment of lucky foods served in beautiful lacquered boxes, each dish carrying a wish for prosperity. In Nikko, it is a long-standing tradition to include *Yuba* (soy milk skin) and *Mizu-yokan* (soft bean jelly) in these boxes, enjoying them in the cozy warmth of a *Kotatsu* (heated table).

Yuba is a versatile delicacy: savor it in a steaming bowl of Soba noodles or try it as "Sashimi Yuba" to appreciate its delicate, natural flavor. For sweet lovers, Nikko is famous for *Yokan*. We recommend the refreshing *Mizu-yokan* for immediate enjoyment and the firmer *Neri-yokan* as a perfect souvenir. With many historic confectionery shops in town, finding your favorite is a journey in itself.

Winter is also the peak season for strawberries. The freezing temperatures concentrate their sweetness, creating a perfect balance with a hint of acidity. This "edible ruby" is a gift from Nikko's pure water and the dedicated craftsmanship of local farmers. Whether you visit a farm for fresh picking or indulge in exquisite sweets at a local cafe, Nikko's strawberries are a must-try.

Tochigi Prefecture, home to Nikko, is Japan's leading strawberry producer, proudly holding the top spot for 58 consecutive years as the 'Strawberry Kingdom'.

Winter marks the peak of the sake-brewing season in Nikko. The combination of pristine spring water from the Nikko mountain range and the intense winter chill refines the sake, giving it an exceptionally crisp and pure character. From December to February, "Shinshu" (newly brewed sake) makes its highly anticipated debut. Visiting a sake brewery during this time is a sensory delight—step into an atmosphere filled with the fresh, floral aroma of freshly pressed sake, observe the time-honored craftsmanship, and enjoy a tasting of the season's first offerings. To accompany your drink, explore the rich fermented foods of the Nikko Imaichi area. Traditional staples like miso and *tamari-zuke* (vegetables preserved in soy sauce concentrate) develop a profound depth of flavor during the cold months. We invite you to experience these authentic tastes, which form the heart of both Nikko's heritage and Japanese culinary tradition.

Experience a Sake Brewery Tour

Two historic sake breweries in Nikko offer guided tours of their facilities. While standard tours are free of charge, "Premium Plans" are also available for a deeper experience (additional fee applies).

Please ensure you make a reservation at least one day in advance.
